Company Qualifications

SS Customs builds custom product displays, technical cutaways, branded environments, architectural millwork and specialty fabrications. Founded by Steve Scheich in 2024, the company draws on more than 22 years of hands-on experience in carpentry, metalwork, welding, exhibit fabrication, client product finishing and on-site installation.

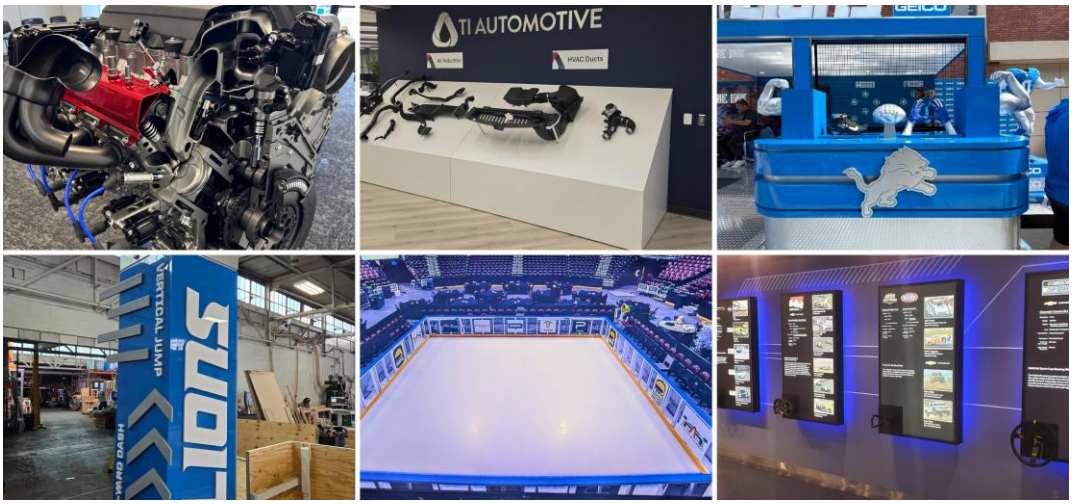

Core Capabilities

- Custom displays, exhibits and branded environments
- Technical cutaways and training aids
- Architectural carpentry and commercial millwork
- Client product preparation and paint finishing
- Mixed-material fabrication using metal, acrylic, hardwood, laminate and composites

Project Execution

- Precision TIG and MIG welding in aluminum, stainless steel and mild steel
- Static or animated product displays
- Coordination of specialty chrome and outsourced finishes
- Delivery, on-site installation and traveling event support

Every project receives direct owner involvement from planning through fabrication, delivery and installation.

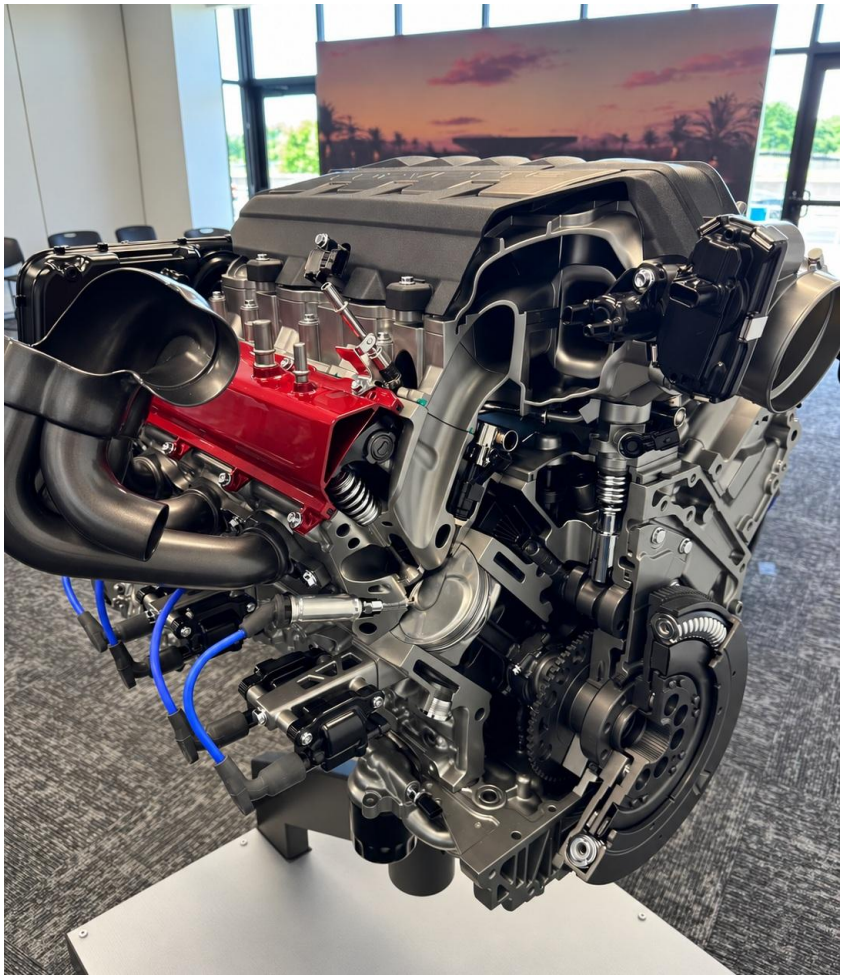

Selected work includes technical cutaways, product displays, branded environments, event fabrication and interactive exhibits. Certain projects were completed by Steve during prior employment and demonstrate capabilities offered by SS Customs today.

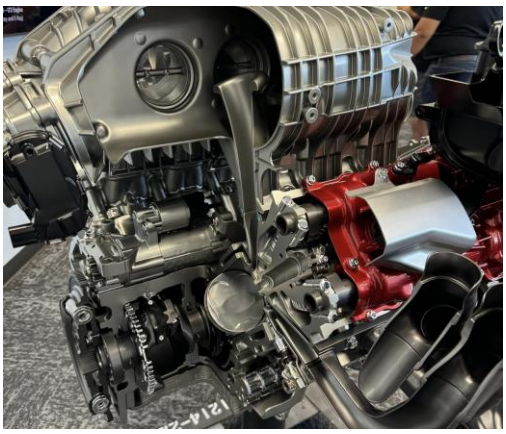

PRODUCT PRESENTATION

Technical Cutaways and Product Displays

Steve transforms complete engines and components into clear presentation pieces. He disassembles each unit, plans the cut lines with product engineers, modifies the housings to reveal key internal parts, and then reassembles the display on a custom stand. Specialized paint and chrome plating are coordinated through outside finishing vendors when required.

Representative engine cutaway completed by Steve during prior employment; this work demonstrates capabilities offered by SS Customs today.

Precision openings reveal airflow, valvetrain and internal assemblies.

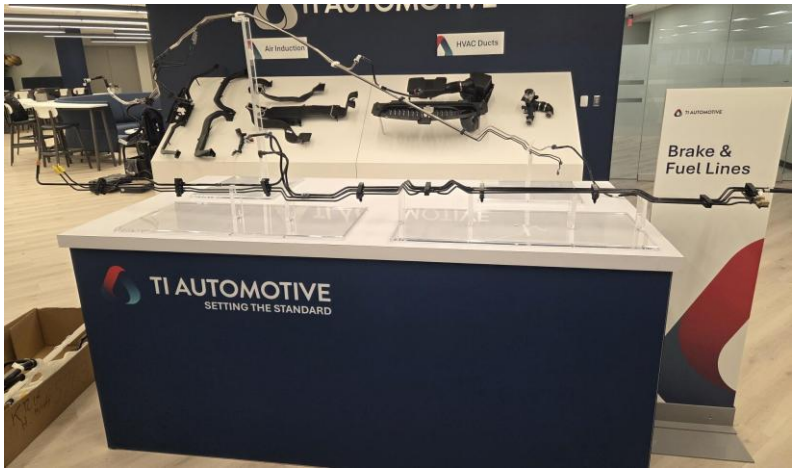

Contrasting finishes help viewers follow the mechanical systems.

Product Displays

These custom display systems combine branded millwork, clean product mounting and precise component presentation. Steve fabricated the fixtures and mounting systems used to organize air induction, HVAC duct, exterior, brake and fuel line components in the client's presentation space.

Large-format display wall for air induction and HVAC components.

Brake and fuel line display with custom acrylic supports and branded cabinetry.

Exterior component display with angled presentation pedestal.

Detroit Lions Size Me Up Bar

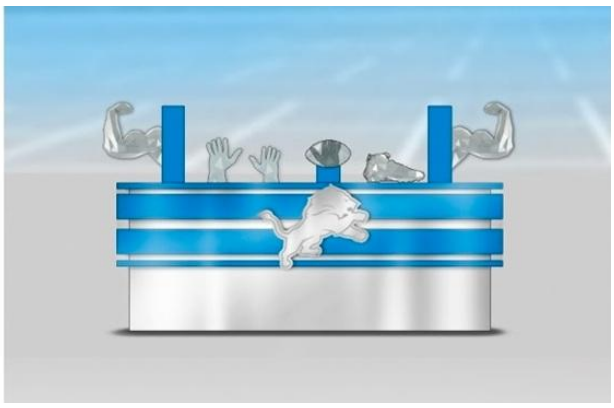

SS Customs fabricated an interactive fan display that lets visitors compare their arms, hands, footwear and football grip with NFL player measurements. The finished bar incorporates dimensional Lions branding, custom paint finishing, integrated comparison elements and illuminated blue accents.

Completed Size Me Up Bar installed for the Detroit Lions fan experience at Ford Field.

Integrated comparison elements and custom Lions detailing.

Concept image used to guide fabrication and placement.

Detroit Lions Size Me Up Totem

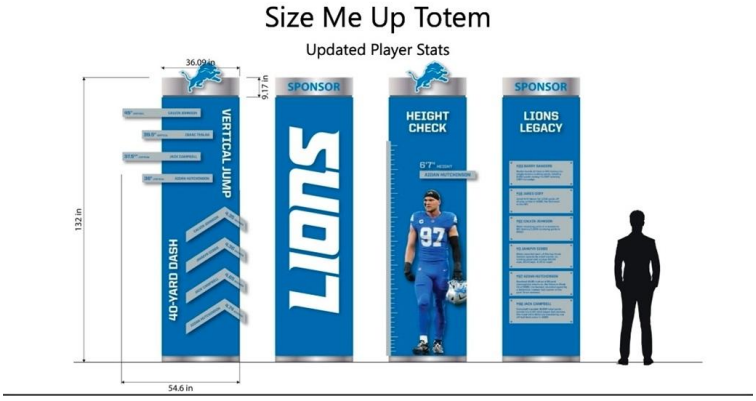

The full-height totem converts player performance data into a durable museum-style experience. Its four sides present vertical jump, 40-yard dash, height comparison and Lions legacy information using dimensional lettering, adjustable comparison markers and branded finish work. SS Customs fabricated the finished four-sided installation from the approved client concept and player-stat layout.

Vertical jump and 40-yard dash side.

Lions legacy and height comparison side.

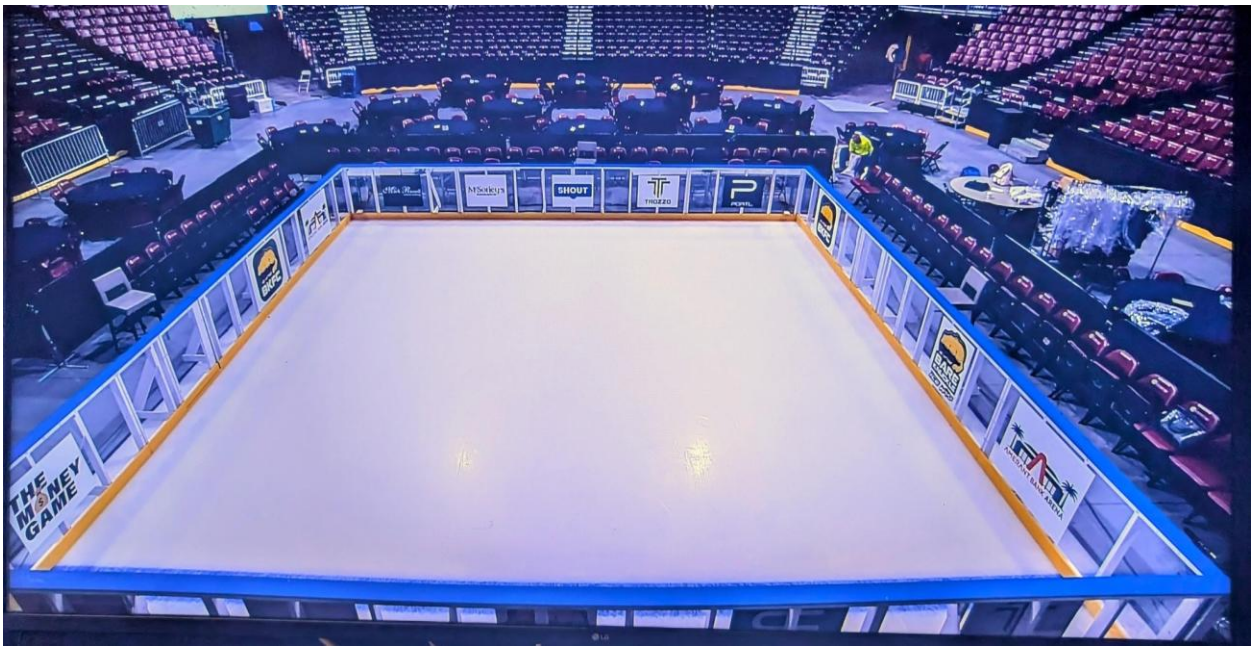

Original totem concept and player-stat layout.

TOURING FABRICATION

Bare Knuckle Fighting Event Arena

SS Customs fabricated the complete traveling arena used for Bare Knuckle Fighting Championship Ice Wars events. Steve also travels with the organization to manage setup and teardown, giving him direct experience with equipment that must withstand repeated transportation, installation and live-event use.

Full arena configuration prepared for a live national pay-per-view event.

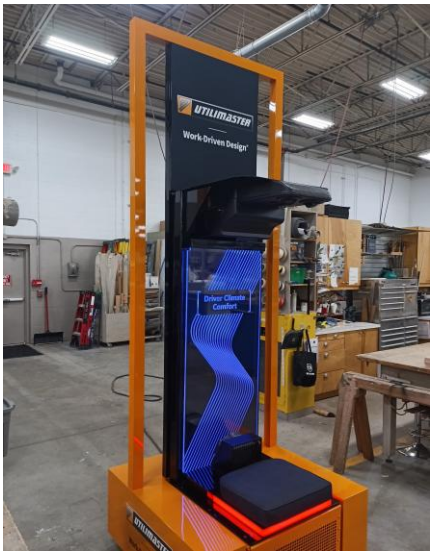

Modular wall construction, sponsor panels and reinforced corners support repeated event deployment.

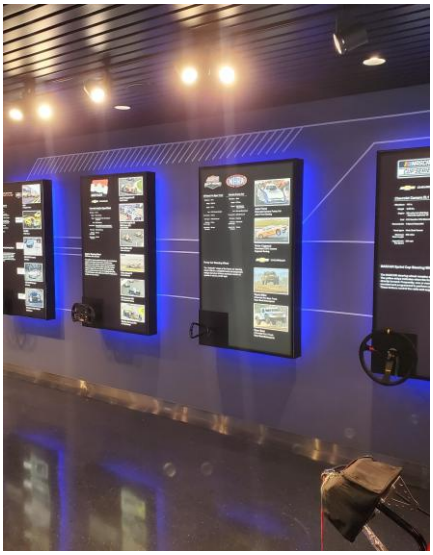

SELECTED WORK

Additional Custom Fabrication

Additional work includes interactive trade-show and museum exhibits, illuminated product displays, custom mounting systems, architectural millwork, conference tables, retail elements and one-off personal pieces. Steve completed the featured projects shown from fabrication through final assembly.

Representative interactive display project completed by Steve during prior employment.

Illuminated motorsports exhibit with interactive steering wheel displays.

Custom dual-sided monitor display structure.

Project Approach

Review the concept and application with the Client, confirm materials and finish requirements, fabricate and assemble the build, coordinate specialty finishing, fabricate custom crating, and support delivery or installation as required.
